

## Reading data in GitHub from Colab:

1. In the **“Code”** tab of your GitHub repository, click the data file to read
2. In the new window, click **“raw”**
3. Copy the URL for this data file
4. In your Colab notebook, add the following code and paste in the URL:

```
import pandas as pd
data = '[URL to data file in your GitHub repository]'
df = pd.read_csv(data)
df.head()
```

## Read GitHub data in Colab

N.B. This copy of your Colab notebook on GitHub will be publicly visible

## Saving your Colab Notebook to GitHub:

1. In the **“Settings”** page of your GitHub Organisation, click **“OAuth application policy”**
2. Click **“Remove restrictions”**, and confirm
3. In your Colab Notebook, click **“File” >> “Save a copy in GitHub”**
4. Select your GitHub repository and click **“ok”**
5. In **“Share”**, set General Access to **“Anyone with the link”** and the role to **“Editor”** (you only need to do this step just before submission)

## Save Colab Notebook to GitHub
